

Baralaba South Project

About the Baralaba South Project

Located approximately 8km south of the central Queensland town of Baralaba and 115km southwest of Rockhampton, Mount Ramsay Coal Company's proposed Baralaba South open-cut metallurgical coal mine will produce up to five million tonnes per annum of run-of-mine coal for export of low-volatile pulverised coal injection coal.

The mine will use traditional truck-and-excavator methods and product coal will be hauled approximately 40km by public road, using covered road trains, to the company's existing train load-out facility located 2km east of Moura.

The greenfield Baralaba South Project (MLA 700057) will contribute to the local and regional economy via procurement, 600 (peak) operational jobs and a further 275 (peak) jobs during construction.

About Mount Ramsay Coal Company

Mount Ramsay Coal Company is a wholly owned subsidiary of Baralaba Coal Company – operator of the nearby Baralaba North Mine.

Community engagement

Mount Ramsay Coal Company understands that engaging with the community is critical to our business. We are committed to effective consultation and recognise that engagement must continue throughout the life of our operations. There are a number of opportunities through the approvals process for local communities and stakeholders to be involved and to provide feedback. These include stakeholder consultation throughout the Environmental Impact Statement (EIS) process and the EIS public comment period.

The Environmental Impact Statement Process

An EIS is being prepared to identify environmental values associated with the Project, potential environmental impacts and the measures to be implemented to avoid, mitigate, manage or offset the impacts. The EIS will be published for review and comment by stakeholders. Responses to submissions will be prepared and the EIS will be amended accordingly.

If approved by the Queensland Government, an EIS Assessment Report will be published, including draft conditions for the Project. Draft conditions will be incorporated into an Environmental Authority under the *Environmental Protection Act 1994*.

Following issue of the Environmental Authority, the Queensland Government will be able to consider the granting of the Baralaba South Mining Lease under the *Mineral Resources Act 1989*. The Mining Lease must be in place prior to the commencement of mining operations.

Have your say

There are many ways that you can access information and participate in the Baralaba South EIS process:

- Project website
- Fact sheets
- Face-to-face or telephone interviews
- Written submissions during public notification of the EIS
